A medium depth, medical grade chemical peel featuring the master antioxidant **Glutathione**.
For all Fitzpatrick I-VI skin types.

Treats all skin conditions with superior results for:

- Acne
- Acne + PIH, improves textural scarring
- Aging skin
- Hyper-pigmentation
- Pore reduction
- Mild Rosacea
- Dry rough body areas

KEY INGREDIENTS

A synergistic blend of acids to reach the papillary dermis. **pH of The Perfect Derma™ Peel 1.3-1.4**

Trichloroacetic Acid (TCA) - chemical providing excellent skin exfoliation and resurfacing while stimulating collagen to repair the skin

Phenol - a chemical that can trap free radicals, exfoliates and numbs the skin

Retinoic Acid (Vitamin A) - exfoliates, normalizes cell turnover, and promotes collagen and elastin production

Salicylic Acid - digests surface cells, has anti-inflammatory properties with anti-acne benefits by clearing clogged pores

L-Ascorbic Acid (Vitamin C) - anti-oxidant and skin brighter also protecting the skin from UV damage while stimulating collagen production

Glutathione - powerful anti-oxidant, the peel's blend of acids delivers Glutathione deep into the basal layer where it improves cellular health, skin brightener

Kojic Acid - antibacterial, suppresses pigment and brightens the skin
